PROFESSIONAL SUMMARY

Senior Software Engineer and Frontend Lead with 17+ years delivering scalable, high-performance web applications in React and Next.js. I architect enterprise data-driven products—complex dashboards, ag-Grid implementations, and real-time analytics UIs—for fintech, retail BI, and global software teams. Expert in TypeScript, SSR, accessible UI (WCAG-oriented), automated UI and API testing (Jest, Playwright, REST/GraphQL integration tests), and CI/CD via GitHub Actions. Proven leader of distributed remote teams; fluent in English and Spanish.

TECHNICAL EXPERTISE

- Frontend & Architecture:** Next.js (App Router), React.js, TypeScript, JavaScript (ES6+), Redux, Redux-Saga, Context API, SSR, Next-Auth, i18next, ag-Grid (Enterprise), HTML5, CSS3, CSS Modules, Styled Components, Material UI, Vue.js, responsive design, accessibility (a11y).
- Testing & Quality:** Jest, React Testing Library, Playwright, Cypress, E2E testing, automated API testing (REST/GraphQL integration & contract tests), MSW, code review, pull-request workflows.
- Backend & APIs:** Node.js, Express, NestJS, GraphQL, REST APIs, PHP, CodeIgniter, CakePHP.
- DevOps & Workflow:** Git, GitHub, GitHub Actions, CI/CD, Agile, Scrum, architectural blueprints, DDD-oriented frontend patterns.

PROFESSIONAL EXPERIENCE

Frontend Lead & Software Architect

Krunchbox | 09/2025 - Present · Remote

- Lead a frontend team of 3 engineers; own sprint delivery, code reviews, and alignment with product and architecture goals.
- Spearhead technical frontend architecture for **Krunchbox 2.0**, defining modular patterns, TypeScript strictness, and scalable state management across business domains.
- Architected a centralized **application shell** (Next.js 15 App Router) maintaining root-level state for AI-assistant and streaming panels; eliminated 100% of per-route remounts and improved UI state retention across 30+ views.
- Designed a lightweight pub/sub **mutex** to coordinate mutually-exclusive side panels, removing ~700 lines of duplicated layout across 34 files with zero route migration and minimal merge risk.
- Direct engineering for **Pluvia**, a retail analytics hub processing large-scale B2B datasets (100k+ rows per grid view) with low-latency ag-Grid configurations.
- Reduced UI regression risk by introducing standardized PR reviews and Jest/Playwright coverage on critical user flows and REST API endpoints.
- Build and maintain automated API test suites (integration/contract tests) to validate backend contracts and catch breaking changes before release.

- Partner with stakeholders across time zones in an async remote setup; document decisions and onboarding for faster team ramp-up.

Senior Software Engineer / Frontend Lead (Associate - FTE)

J.P. Morgan | 08/2023 - 05/2025 · Remote

- Re-hired directly as an Associate FTE after previously delivering high-impact projects for the firm via Globant.
- Spearheaded enterprise-wide TypeScript adoption across core financial dashboards, reducing production regressions by **25%** and accelerating onboarding time for distributed sub-teams.
- Architected enterprise financial dashboards with ag-Grid for real-time data visualization serving internal power users.
- Engineered Next.js SSR strategies that improved application load performance by **30%**.
- Integrated secure authentication (Next-Auth) and state synchronization (Redux-Saga, Context API) in regulated environments.
- Participated in Git-based CI/CD pipelines, peer code reviews, and Agile ceremonies with globally distributed teams.

Senior Software Engineer

Spark Digital | 03/2021 - 07/2023 · Remote

- Delivered high-traffic enterprise frontends for Dow Jones and AMC+, focusing on performance, SEO, and WCAG-oriented accessibility.
- Built modular React/Next.js components with SSR for scalability and responsive layouts across devices.
- Collaborated asynchronously with distributed teams using Git, REST APIs, Redux, and documented component libraries (Storybook).

Senior Software Engineer (Contract / Project-Based)

Santander Tecnología | 11/2020 - 03/2021

- Developed React and TypeScript UI modules for Banco Santander digital banking platforms.
- Refactored legacy code for performance and integration with NestJS microservices.

Senior Software Engineer / Frontend Consultant (J.P. Morgan Project)

Globant | 02/2019 - 11/2020

- Delivered 6 parallel web projects for JPMorgan under strict architecture and security standards.
- Modernized Ubisoft back-office infrastructure with Vue.js, improving operational workflow efficiency.
- Set up React/Redux/GraphQL codebases with Material UI and team code-review practices.

Cloud Consultant / Full-Stack Developer

Oracle | 10/2018 - 02/2019

- Integrated external enterprise services into Oracle Commerce Cloud e-commerce ecosystem.
- Built Node.js/Express API extensions and REST integrations.

Senior Software Engineer

Prisma | 01/2018 - 09/2018

- Developed and performance-tested banking applications for ATM networks (Santander Río, ICBC).
- Implemented React/Node.js transactional flows and E2E test environments for production safety.

Senior Software Engineer

Kavak | 11/2016 - 11/2017

- Migrated legacy WordPress e-commerce to CodeIgniter 3, improving maintainability and checkout stability.
- Built internal pricing module handling 20+ concurrent business variables.

Senior Web Developer

Screen Media Group & Caracas Design | 03/2014 - 11/2016

- Developed enterprise web applications with PHP (CodeIgniter, CakePHP) and WordPress.

Software Engineer

Petróleos de Venezuela S.A. (PDVSA) | 03/2009 - 07/2013

- Built intranet business modules and migrated legacy systems to modern PHP stacks.
- Standardized UI with Bootstrap across internal applications.

SELECTED PROJECT

Adolfo — E-commerce & Jobs Platform

github.com/erickorso/adolfo

- Full-stack portfolio: Next.js 15 (App Router), React 19, TypeScript, Prisma, PostgreSQL, NextAuth, i18n.
- Payment integration (Ualá Bis API v2), cart/checkout flows, and webhook handling.
- Automated testing: Vitest, Playwright E2E, MSW mocks, and REST API integration tests.

LANGUAGES

- **English** — Fluent (professional working proficiency)
- **Spanish** — Native

EDUCATION

Degree in Software Engineering

UNEFA | Caracas, Venezuela (01/2006 - 07/2012)
